Software Applications

Frontend Application

frontend.com

A FRONTEND E-COMMERCE APPLICATION FOR USERS TO BROWSE AND PURCHASE APPAREL (FRONTEND)

- Implemented a React-based frontend that drives user engagement through dynamically-rendering user interfaces (UI) that are delightful to use
- Employed Axios to make HTTP requests to and from node.js with client-side protection against cross-site request forgeries (XSRF)
- Utilized CircleCI for continuous integration in agile development to ensure only properly functioning code is delivered to clients

System Design Application

systemdesign.com

A FULLY CLOUD-DEPLOYED BACKEND TO HOST AN E-COMMERCE APPLICATION (BACKEND)

- Improved PostgreSQL database query speeds by 1233% from 37000ms to 30ms by leveraging database indexing
- Deployed a load balancer via NGINX across three AWS EC2 instances to boost throughput by 58% from 1500 RPS to 2600 RPS
- Stress tested the backend application locally and remotely to achieve fastest performance to improve user experience

FirstPass

firstpass.com

A FREE, OPEN-SOURCE PASSWORD MANAGER (FULLSTACK)

- Conceptualized and implemented a fullstack password manager application within a short turnaround timeframe
- Employed Password-Based Key Derivation Function 2 (PBKDF2) to hash passwords one-way to adhere to NIST password security standards
- Reinforced password security with additional hash with salt stored separately from the hashed password

Blue Ocean

blueocean.com

A SOCIAL MEDIA PHOTO GALLERY DELIVERING MARKETING CONTENT AND SHOWCASING LARGE-SCALE EVENTS (FULLSTACK)

- Collaborated in a small team following agile methodology in order to integrate continuous improvement and to maximize team cohesiveness
- Served as co-architect overseeing the core decision-making over choosing tech stack for the product including frontend, backend, and database
- Built service infrastructure utilizing Docker containers, CircleCI, and deployed onto AWS/EC2 instances

Work Experience
